Cystic Fibrosis: <b>Negative</b>	Tay Sachs: <b>N/A</b>	Sickle cell anemia/thalassemia: <b>Negative</b>
Other: <b>CMV urine culture negative, donor is presumed non-infectious</b>		

**DONOR NARRATIVE: Donor # 4260**

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

**Fairly introverted although I can be very gregarious at times. Wry sense of humor, very intellectual. I love science, learning and understanding how things work. I have a tremendous memory for things I find interesting, regardless of the field. For instance, scientific facts of all kinds. I have a great musical memory and could probably sing all nine Beethoven Symphonies in their entirety from memory. I get along well with everyone, but especially children, which made me a good music teacher.**

What are your special interests and talents?

**Extremely musical. Played violin my whole life, went to a prestigious music conservatory, and have composed music that was performed by professional classical musicians. Good at math, enjoy philosophy, terrible handwriting (obviously), very good at computers, started building and repairing them when I was 13. I have a very broad range of interests and skills. I was encouraged to be a writer and a scientist at various points in my life.**

How would you describe your enjoyment of and skills in the following areas:

math: **Above average, I enjoy it.**

mechanical: **Good, used to work on cars and actually built an engine when I was 17.**

athletic: **Good, won some sprinting events at a track meet in junior high, was pretty good at Kung Fu.**

musical, artistic, creative: **Was always extremely musically precocious. As a child I was very creative and made up vast complicated fantasies, some of which I wrote down into long books.**

language (what languages besides English do you speak?): **None**

What are your goals and ambitions in life?

**I feel like I could excel in a number of fields, but at the moment I'm considering getting a PhD and becoming a conductor and Professor of music history. Also I'm in the process of starting a small business.**

Why do you want to be a sperm donor?

**Partially to save extra money for graduate school. Also I understand that couples getting sperm from the bank are willing to go through a very difficult and complex process and obviously really want a child and will probably be excellent and dedicated parents. I'm honestly honored to contribute to that.**

Did you choose to be an Identity-Release® Program donor? \_\_\_Yes **X**No. Why did you make this choice?

**It's a very difficult decision, but it's one I'm open to reconsidering in the future.**

What message would you like us to pass on to the people who are getting your sperm?

**Good Luck! Parenting is a lot of work! I hope you foster music and science because those run strongly in the family and I hope the entire process is as enriching and beautiful as possible.**
